A stunning achievement of concept and design. A very intimate and private community of only seven units that offer exceptional qualities usually only to be found in private villas. The project takes into account the latest architectural trends, using natural elements of stone and wood with contemporary construction techniques that maximize the efficiency of the properties.

7 UNIQUELY DESIGNED APARTMENTS

The seven South facing apartments and penthouses, each uniquely designed, offer exceptionally large terraces with spectacular sea views. The apartments are smart homes that benefit from a complete automation system with a central control screen to independently manage the functions of these smart-residences. In all of the homes, a weather station is integrated to control the external conditions to automatically operate shutters, blinds and awnings.

The residences are fully protected with an anti-flooding system, as well as a state of the art intruder alarm to guarantee a fully protected home.

THE APARTMENTS

The spacious living areas boast exceptionally large, floor to ceiling windows without any visible carpentry, that operate via a remote control system that integrates to perfection the indoor and outdoor areas, maximizing the panoramic sea views and guaranteeing the sensation of space and light. The integrated ethanol fireplace together with the radiant floors contributes to a cosy atmosphere, even in the few cold days in winter. Each apartment is unique in its design and all of them offer an open plan living area, with a cook's dream kitchen, fully equipped with the highest quality appliances to provide comfort, convenience and a sophisticated design.

THE BEDROOMS

The apartments are composed of three large bedrooms with en-suite bathrooms and built-in wardrobes. The master bedrooms are bright and spacious, orientated to the South of the building, with direct access to the terraces and include a stunning dressing room with an integrated safe box.

THE BATHROOMS

The bathrooms are all en-suite and the master bathroom offers a double sink with a built in wooden cabinet below and is equipped with thermostatic faucets, as well as electric towel rails. Some bathrooms enjoy private terraces with an outdoor shower. All bathrooms have radiant floors.
